

## Emergency Oxygen Rescue Kit

Oxyrescue is a simple to use device for the administration of pure, compressed oxygen.

The integrated multifunctional valve is build with the best oxygen compatible materials and is the result of many years of research in this field. Its limited weight and size make it perfect for all emergency centers, including boats and diving centers.

Code 18006

A simple device for the administration of pure oxygen. The kit includes a 5L oxygen tank at 200bar. A multifunctional, integrated valve allows the user to dispense continuously oxygen while regulating the oxygen from 0 to 24L/min as well as to use a transparent silicone mask with a demand valve for delivery as needed.

Transparent silicone mask with demand valve

Valve with integrated flow reducer

All is contained in a 800 X 160mm (l X w) plastic case, and weighs 7.5Kg.
